| / dab nost="corgan: Inflorescence at begining of development (lorn-long); Vector: pSport1; Site=1: Sal1; Site=2: NotI; An unidirectional cDNA library generated from [Inflorescence at begining of development (lorn-long)].
| cDNA was prepared from polyah mRNA using SuperSorribt Plasmid System KIt (Invitrogen). The double-strand cDNAs were fractionated in a sepharose CL-2B 40cm-columns and fragments sizing between 0; 8 and 1.5 KD were directionally cloned into the vector. Details of each source of RNA and library construction can be obtained at http://sucest.lad.ic.unicamp.br/public"

/clone_lib="687 - Early embryo from Delaware"
/note="Organ: embryo; Vector: pBluescript SK; Site_1:
Xho!; Site_2: EcoRi; Library was prepared by Statagene
using the Uni-2AP RK system (Stratagene BN937328-12).
Clones were picked by a Q-bot after blue/white selection
(ampicullin resistance - use 100 micrograms/microliter).
Developed from a pool of equal amounts of RNA from
developing embryos sampled at 14, 21, 28 and 35 days after
pollination of the Illinois High Oil Maize Strain Cycle
90. This closed strain has been selected for high oil
concentration for 90 generations and originates from the
1890s era open pollinated variety Burr's White"
                                                                                                                                                                                                                                                                                                                                                                                                                                                    1028

An unidirectional cDNA library generated from
[Inflorescence at begining of development (lon-long)]
CDNA was prepared from polyA+ mRNA using SuperScript
Plasmid System Kit (Invitrogen). The double-strand cDNNs
were fractionated in a sepharose CL-2B 40cm-columns and
fragments sizing between 0.8 and 1.5 Kb were
directionally cloned into the vector. Details of each
source of RNA and library construction can be obtained at

rubrisubalbicans; Vector: pSport1; Site_1: Sal1; Site_2:
Not1; An unidirectional cDNA library generated from
[seedlings inoculated with Herbaspirilum
rubrisubalbicans]. cDNA was prepared from polyA+ mRNA
using SuperScript Plasmid System Kit (Invitrogen). The
double-strand cDNAs were fractionated in a sepharose
CL-2B 40cm-columns and fragments sizing between 0.8 and
1.5 Kb were directionally cloned into the vector. Details
of each source of RNA and library construction can be
obtained at http://sucest.lad.ic.unicamp.br/public"
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          384
